SlideShark Team Edition

Control the Show... from Anywhere

Your sales reps and services staff are the face of your organization, but their use of unapproved, out-of-date presentations can hinder their effectiveness and even reflect poorly on your company. To improve sales productivity and ensure compliance, your reps must be using the right content at all times, regardless of the device they're using.

With SlideShark Team Edition, presenters can easily access and present up-to-date and approved PowerPoint® content, straight from their iPad, iPhone, iPod touch, PC/Mac computer or Windows 8 tablet. They can even broadcast their slides in real time over the web to remote or in-person meeting attendees who can join from any device. The solution also empowers you to easily add, delete or update presentations as needed, and distribute them via the cloud for fast, secure access. You can even measure and monitor the use of this content – something never before possible – all in real-time!

Powerful analytics

SlideShark viewing analytics make it possible to know how your PowerPoints are being used in the field. Quickly gain access to dashboards and reports online and within the app to find out which presentations are being used most often, which slides are being shown by which users, and when! You can even determine what device was used to present – iPad, iPhone, or computer. Team members can also access their own reports on the viewing results for presentations they share online with prospects, allowing for more informed, effective follow-up.

Built for business

With SlideShark Team Edition, administrators have full control over users and content for maximum security. Built on Brainshark's reliable and scalable cloud computing infrastructure, SlideShark Team Edition provides access to your most important PowerPoint content anytime, anywhere, 24 hours a day.

- **Account administration.** Easily add or remove users and manage user permissions. You can also manage content upload permissions, cloud storage provider access, content visibility and folders, presentation sharing permissions, and billing information all from one location.
- **Personalized content.** Optionally give permission to team members to upload presentations to their own personal content folder or customize company-provided presentations by hiding or re-ordering slides.
- **Broadcasting.** Show your slides over the web to remote meeting attendees right from your iOS device, and get detailed analytics on attendee participation
- **SlideShark Anywhere.** Access, present and broadcast presentations from your PC, Mac or Window 8 tablet with SlideShark's intuitive web interface.
- **Single Sign-On.** Make your Team Edition experience even more secure and convenient by allowing users to access the system via SSO.
- **Team storage.** Ensure your users have plenty of space for team and optional personal content with 5 GB of Team Storage, with the ability to add more storage as needed.

SlideShark™

Access and Functionality

- Access and import presentations stored in Box, Dropbox, Syncplicity, Google Drive, OneDrive or ShareFile from within the app
- Present and broadcast your presentations to in-person or remote attendees from either your iOS devices or your computer or Windows 8 tablet
- Download to iOS devices for offline viewing and presenting
- Connect to a projector, TV or AirPlay
- Use an iPhone or iPod touch as a remote control for your iPad
- Draw or highlight on slides with “pen” or “highlighter” (choice of 9 colors, 4 thicknesses), and erase or save annotations
- Use laser pointer effect to highlight slide content during presentations

Flexible Management and Content Control

- Use a centralized control panel to manage users, content and reporting
- Enable team members to log in with Single Sign-On (SSO)
- Assign content access permissions by individuals and teams
- Gain visibility into all content stored in the system
- Update content, add/delete users, customize views by user
- Bulk upload PowerPoint content

Compliance and Reporting

- Upload presentations and make content instantly available to all team members
- Ensure consistent branding and messaging by maintaining up-to-date content
- Replace outdated presentations and retain historical usage data
- Report on content usage patterns
- Track audience viewing behavior for presentations shared via email or broadcast over the web
